

ECH₂O Tec.™ *Watermakers*

Big Blue™ Cartridges - Industrial and Residential
Designed for 4-1/2" diameter, 9-3/4" and 20" standard filter housings

Highly efficient filter cartridges available in a selection
of media with the industry's largest surface area

- Lower overall operating cost
- Longer filter runs for fewer change outs
- Lower initial pressure drops
- Reduced maintenance down time and cost
- Increased contaminant removal
- High flow capability

Features

Pleated design for more surface area

FDA approved materials - NSF 61 certified

Engineered media for superior performance

Cleanable and reusable in most applications and
micron sizes

Thermally bonded end caps to ensure better sealing

Color coded end caps for easy micron identification

Full product line - largest selection of micron ratings

Applications

Desalination Pre-filtration

Reverse Osmosis Pre-filtration

Cooling Tower Filtration

Municipal Drinking Water Filtration

Chill Water Loop Filtration

Commercial/Residential Drinking Water

Food & Beverage Filtration

Industrial Water Filtration

Marine / Aquatic Filtration

Specifications

Nominal Micron Ratings: 0.35, 1, 5, 20,
50 microns

Shrink Wrap: Standard on all cartridges

Absolute Micron Rating: 1 micron

Media: Polyester, Synthetic, Nano Fiber

Temperature: up to 140°F (60°C)

End Caps: Pliable PVC with sealing
surface

Center Tubes: ABS or PVC
